You would also be required to choose a password for the app This should be known only to the person setting it up.. Apart from this, every visited website is logged and it even monitors the clipboard, letting you know things copied and pasted.. As a matter of fact, it's we regular folks even need it more If you intend to monitor what your kids do on family's computer, the kind of messages they send and the kind of websites they visit, installing a spy app on their devices or putting a discreet key logger on their computer might be the best approach.
